AeroTecTM
AC

PATENT # 11,041,641

Associates can often face extreme temperatures while working inside a trailer.

Temperatures inside a trailer can reach up to 130° F. Tackling these extreme conditions has been an industry challenge for decades. Once again, DL Manufacturing has developed a permanent solution for a dangerous problem. AeroTecAC provides relief to associates exposed to dangerous heat inside the trailer. AeroTecAC works by circulating conditioned air throughout the entire trailer in a high-velocity column to quickly reduce temperatures & humidity. Our patented design has a dramatic effect on climate inside the trailer.

Keeping cool conditions in the trailer at the loading dock provides better employee comfort and improves productivity while making for a safe work environment.

AeroTecAC Package includes:

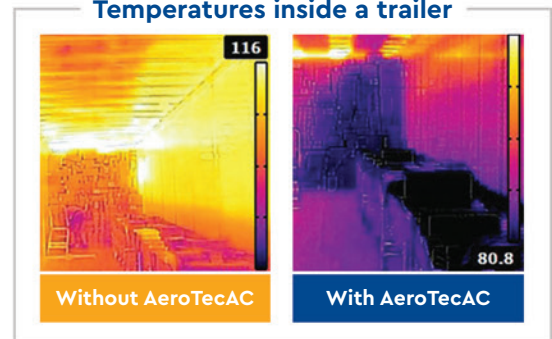

Super AeroTec

- Super AeroTec Air Replacement System
- 24" Mounting Bracket suitable for various wall types
- Cold water or refrigerant coil box as appropriate for site- and project-specific conditions
- Coil bracket & Coil filter bracket
- Flexible insulated transition ducting
- Fully automated control system
- Engineering design consultancy

Can be designed with refrigerant or chilled water based cooling systems
